I am Amer, I am an eager engineer with a passion to learn, grow and challenge.

---

## Experience

### Makersvalley LLC | Software Engineer | Texas, USA

Built the client side of the company's platform as a process-oriented B2B system. (React, Redux & Sass)

## Education

### Erbil Polytechnic University - Bachelor

Information Systems Engineering | June 2023 | Erbil, Iraq

Curriculum includes subjects in the CS field such as: OOP, design, advanced mathematics, engineering analysis, system design, network systems, hardware architectures, business management, etc...

## Skills

Java \* Spring Boot \* Spring Data \* Spring Cloud \* Node.js \* Next.js \* React \* Angular \* PostgreSQL  
\* MongoDB \* Microservices \* Design Patterns \* Heroku \* Azure Cloud \* Git \* Docker \* RabbitMQ

## Projects

### Horizon Project - [GITHUB](#) | [WEBSITE](#)

- A suite of native microservices that compose up a web application to serve tv show media contents to users. It is built using the following technologies: **Angular, Spring Boot, Node.js, PostgreSQL, MongoDB, RabbitMQ, Azure Cloud & Docker.**
- Serves video content through **HLS** (Http Live Streaming).
- Implemented authentication using **JWT**.

### Aurora Shop - [GITHUB](#) | [WEBSITE](#)

- An ecommerce website developed using the following technologies: **Node.js, Next.js, MongoDB.**
- Uses **JWT**-based authentication to store the user state.

### Machine Learning Visualizer - [GITHUB](#) | [WEBSITE](#)

- A machine learning algorithm visualizer built in **React.js** and **Django** from scratch.
- Implemented using **D3.js** and **numpy**.
